

Transpro Freight Systems Announces Purchase of Trans-Send Freight Systems Ltd.

Transpro Freight Systems is pleased to announce the purchase of Trans-Send Freight Systems Ltd. The additional fleet and human resources immediately expands Transpro's USA footprint. Current Trans-Send President, Lisa Carwardine will stay on with Transpro Freight and assist with the transition as the two operations merge.

Trans-Send shares a similar "family owned" culture with Transpro and both organizations have very low employee turnover. Frank Prosia, President of Transpro Freight comments, "Bringing our two companies together was a very good fit on both sides. We share a similar history and common values. The industry will continue to consolidate. At Transpro Freight, our objective is to bring higher efficiency and expanded offerings to our clients."

Trans-Send specializes in cross border truckload services and offers both single and team driver service. Core markets include the shipment of high value goods between the Greater Toronto Area and Austin, TX, Memphis, TN, Nashville, TN, Charlotte, NC, Cincinnati, OH and Huntsville, AL. They also provide a freight management offering. These services will be integrated into the Transpro Freight Systems offering over the next few weeks.

President of Trans-Send Freight Ltd., Lisa Carwardine adds, "Our family has 25 years of history that went into building this company. We have a great team and wonderful clients. By joining the Transpro Group, we can continue that journey, share our success and continue to serve our customers with a personalized, quality service under the Transpro Freight Systems banner."

Transpro Freight Systems provides reliable, cost effective solutions for their customers' Transborder LTL and Truckload requirements. They handle both dry goods and perishable products. They also offer warehousing and distribution programs and complement these asset based services with a full range of third party logistics services. The company has all the processes and security programs in place to offer seamless service across North America. The latest technology is in place to provide real time shipment visibility for their customers and the company is both ISO and SmartWay certified. To find out more about their services visit their website at www.transprofreight.com.
